Table of contents

Abé, H.: see Hua, T.-D. 469
Achenbach, J. D.: see Kitahara, M. et al. 129
Ang, K. K.: see Valliappan, S. 321
Atluri, S. N.; Reissner, R.: On the formulation of variational theorems involving volume constraints 337

Bar-Yoseph, P.: Space-time discontinuous finite element approximations for multi-dimensional nonlinear hyperbolic systems 145
Bernadou, M.; Trouvé, P.; Ducatel, Y.: Approximation of general shell problems by flat plate elements. Part 1 175
Bert, Ch. W.; Jang, S. K.; Striz, A. G.: Nonlinear bending analysis of orthotropic rectangular plates by the method of differential quadrature 217
Buchanan, G. R.; Sallah, M.; Fong, K. F.: Variational principles and finite element analysis for polarization gradient theory 447

Cazenave, T.; Haraux, A.; Vazquez, L.; Weissler, F. B.: Nonlinear effects in the wave equation with a cubic restoring force 49
Chen, L. G.; Li, Y. S.; Wong, K. K.: An efficient semi-implicit finite element scheme for two-dimensional tidal flow computations 161

Das, S. K.; Utku, S.; Salama, M.: Parallelization of the Volterra algorithm for linear optimal open loop control 305
Dimarogonas, A.: see Papaeconomou, N. 88
Ducatel, Y.: see Bernadou, M. et al. 175

Eguchi, Y.: see Okuda, H. et al. 119

Folias, E. S.; Reuter, W. G.: On the equilibrium of a linear elastic layer 459
Fong, K. F.: see Buchanan, G. R. et al. 447
Fujishiro, S.: see Sato, K. et al. 241

Gellert, M.; Harbord, R.: A stable vorticity-velocity formulation for viscous flow analysis 417
Guttalu, R. S.; Udwadia, F. E.: Period three may not mean chaos: An example of a piecewise linear map 113

Haraux, A.: see Cazenave, T. et al. 49
Harbord, R.: see Gellert, M. 417
He, Q.: see Wu, S. et al. 23
Housner, J. M.: see McGowan, P. E. 227
Hua, T.-D.; Abé, H.: A simplified analysis of the dynamic stress-intensity factors for the part-through surface crack in an elastic plate 469

Ikegawa, M.: see Shikano, Y. et al. 283
Ioannidis, G.: see Yiagos, A. N. et al. 95

Jang, S. K.: see Bert, Ch. W. et al. 217
Jones, R.; Tay, T. E.; Williams, J. F.: Thermomechanical behaviour of composites 255
Ju, J. W.: see Simo, J. C. 375

Kanayama, H.; Toshigami, K.: A partial upwind finite element approximation for the stationary Navier-Stokes equations 209
Kikuchi, M.: Application of the symbolic mathematics system to the finite element program 41
Kim, Y. H.; Lee, S. W.: A small strain, moderately large deflection finite element beam model with cross-sectional warping effect 366
Kitahara, M.; Nakagawa, K.; Achenbach, J. D.: Boundary-integral equation method for elastodynamic scattering by a compact inhomogeneity 129
Kobiyama, M.: The reduction of computational time of the Monte Carlo method, applied to radiative heat transfer with variable properties, by using a fixed properties loop 33
Kounadis, A. N.: see Yiagos, A. N. et al. 95

Le Dret, H.: Folded plates revisited 345
Le Dret, H.; Modeling of a folded plate 401
Lee, S. W.: see Kim, Y. H. 366
Leung, A. Y. T.: Nonlinear natural vibration analysis of beams by selective coefficient increment 73
Li, Y. S.: see Chen, L. G. et al. 161

McGowan, P. E.; Housner, J. M.: Nonlinear dynamic effects in the slewing of flexible space booms during deployment 227
Mizomoto, M.: see Ueda, T. 263
Mukherjee, S.: see Song, G.-S. 104

Nakagawa, K.: see Kitahara, M. et al. 129
Nakano, S.: see Shikano, Y. et al. 283

Ohkawa, T.: see Takahashi, R. 273
Okuda, H.; Yagawa, G.; Eguchi, Y.: A 3-D turbulent flow analysis using finite elements with k-ε model 119
Papaeconomou, N.; Dimarogonas, A.: Vibration of cracked beams 88

Reissner, R.: see Atluri, S. N. 337
Reuter, W. G.: see Folias, E. S. 459

Salama, M.: see Das, S. K. et al. 305
Sallah, M.: see Buchanan, G. R. et al. 447
Sato, K.; Yamamoto, S.; Fujishiro, S.: On the dynamic response of the hysteretic system 241
Shi, Z.-C.: On Stummel's examples to the patch test 81
Shikano, Y.; Ikegawa, M.; Nakano, S.: Numerical analysis of two-dimensional compressible turbulent flows in a turbine stage 283
Simo, J. C.; Ju, J. W.: On continuum damage-elastoplasticity at finite strains 375
Song, G.-S.; Mukherjee, S.: Boundary element method analysis of bending of inelastic plates with general boundary conditions 104
Stein, E.; Wagner, W.; Wriggers, P.: Nonlinear stability-analysis of shell and contact-problems including branch-switching 428
Stern, M.: see Wu, T. W. 293
Striz, A. G.: see Bert, Ch. W. et al. 217

Takahashi, R.; Ohkawa, T.: Numerical experiment on interaction of solitons describing recurrence of initial state 273
Tay, T. E.: see Jones, R. et al. 255
Toshigami, K.: see Kanayama, H. 209
Trouvé, P.: see Bernadou, M. et al. 175

Udwadia, F. E.: see Guttalu, R. S. 113
Ueda, T.; Mizomoto, M.: Aerodynamic structure of a flat plate laminar boundary layer with diffusion flame 263
Utku, S.: see Das, S. K. et al. 305

Vazquez, L.: see Cazenave, T. et al. 49

Valliappan, S.; Ang, K. K.: η method of numerical integration 321
Venkayya, V. B.: Optimality criteria: a basis for multidisciplinary design optimization 1

Wagner, W.: see Stein, E. et al. 428
Weissler, F. B.: see Cazenave, T. et al. 49
Williams, J. F.: see Jones, R. et al. 255
Wong, K. K.: see Chen, L. G. et al. 161
Wriggers, P.: see Stein, E. et al. 428
Wu, S.; Zhang, X.; He, Q.: Analysis of stress intensity factors for three-dimensional finite cracked bodies by a variational alternating method 23
Wu, T. W.; Stern, M.: Boundary element analysis of ductile crack growth using the traction-free fundamental solution 293

Yagawa, G.: see Okuda, H. et al. 119
Yamamoto, S.: see Sato, K. et al. 241
Yiagos, A. N.; Ioannidis, G.; Kounadis, A. N.: The effect of interaction of loadings and geometry imperfection on the buckling state of frames 95

Zhang, X.: see Wu, S. et al. 23
